Siddharth Gupta

Full-Stack Developer | React | .NET | Fintech and Automotive
Noida, India | +91 6391063555 | siddharthgupta1556@gmail.com | linkedin.com/in/siddharthgupta555 | github.com/siddharthguptaa

PROFESSIONAL SUMMARY

Lead Full-Stack .NET and React Developer with 5+ years of experience building web applications with React and .NET (C#, TypeScript, ASP.NET Core Web API, EF Core, SQL Server) in fintech and automotive. Led delivery of Prozeus, an automotive project management platform, and ODIN, a financial tool for mold costing and project tracking, and built the Web API and database behind RBM Android App, a B2B fintech app with 500,000+ users. Skilled in onion architecture, secure coding, performance optimization, Agile/Scrum, and coordinating offshore teams.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, jQuery, HTML, CSS, C

Frontend: React 18, Redux, Tailwind CSS, Chakra UI, Jest

Backend: .NET 3.5 to .NET 8, ASP.NET Core Web API, ASP.NET Web API 2.0, MVC, Web Forms, WCF, REST and SOAP services, LINQ, Entity Framework, EF Core, ADO.NET

Databases: SQL, SQL Server, MySQL, stored procedures, indexes, triggers, views, functions, query optimization, database monitoring

Cloud and DevOps: Azure, Azure DevOps, CI/CD pipelines, Docker, IIS, Git, GitHub, Bitbucket, TFS, SVN, JIRA

Architecture and security: Onion architecture, microservices, SOLID, design patterns, JWT, OAuth 2.0, SSO, secure coding, vulnerability scans

Testing and tools: TDD, BDD, JMeter, Postman, Swagger, Visual Studio, Visual Studio Code, SSMS, DevExpress

AI tools: GitHub Copilot, Claude, prompt design, LLM and API integration

Management: Team building, IT recruitment and hiring, offshore team coordination, Agile and Scrum, release and sprint planning, project planning, stakeholder and client communication, client relationship management, client and user support, technical documentation

WORK EXPERIENCE

Lead Full Stack .NET and React Developer, Motherson Technologies Services, Noida, India

Apr 2023 - Present

- Led Prozeus, an automotive project management platform used by Motherson, a Tier-1 supplier, to plan projects from RFQ to part supply, covering PPAP, change management, risk management and gate reviews GR-1 to GR-8.
- Planned all technical topics for Prozeus, from the backend (onion architecture, .NET 8 Web API, EF Core, SQL) to the React 18 front end, and delivered it with a team of 4.
- Led ODIN, a financial tool for mold costing and project financial tracking used by the Sales, Finance and Engineering departments, as lead and backend developer: set the architecture, built the APIs (React 18, .NET 8 Web API, EF Core, SQL), handled client and user support, and turned business requirements into software with a team of 4.
- Worked through every Agile phase: requirements analysis, architecture design, development, testing, deployment and ongoing support.
- Planned and managed deployments in coordination with partner teams.

Senior Full Stack .NET Developer, Redmil Business Mall Private Limited

Dec 2021 - Apr 2023

- Built the ASP.NET Web API 2.0 and maintained the SQL database behind RBM Android App, a B2B fintech app (BBPS bill payments, IRCTC rail booking, AePS, loans and credit card applications) used by more than 500,000 people.
- Supported an average of more than 500,000 API hits per day while keeping data accurate and consistent, using database indexes, caching and checks against duplicate payments.
- Built the RBM Admin Panel as a full-stack developer (Web Forms, Web API 2.0, ADO.NET, SQL), used by internal accounts, business and support teams to manage the overall functions of the app.
- Coordinated offshore application teams and guided them through every phase of each project.
- Tracked open issues and client queries in a daily query-tracking sheet shared with the client and offshore team.

- Wrote functional and high-level technical documents for each application.
- Planned implementation dates weekly so releases did not conflict with other activities.

Web App Developer, Opticodes Technologies Private Limited
Nov 2020 - Dec 2021

- Designed and developed ASP.NET Web APIs that let first-time users make GST transactions and generate e-invoices and e-way bills.
- Delivered GST API App, E-Way Bill API App and E-Invoice API App (Web API 2.0, ADO.NET, SQL) and MyGSTCafe (Web Forms, MVC, Web API 2.0, ADO.NET, SQL).
- Wrote and maintained database scripts, stored procedures, triggers and views containing the required business logic.

EDUCATION

- Master of Computer Applications (MCA), Aug 2018 - Aug 2021, 84%
- Bachelor of Computer Applications (BCA), Aug 2015 - Aug 2018
